Education

Colorado School of Mines, Golden, CO

December 2026

Master of Science in Computer Science, Applied Algorithms

Colorado School of Mines, Golden, CO

May 2025

Bachelor of Science in Computer Science

Honors & Affiliations

- Student Athlete on the Cross Country and Track Team
 - 2024 & 2025 RMAC Indoor Champions
 - 2025 RMAC Cross Country Champions & National Runner Up
- Dean's List, Spring 2025
- Honor Roll, Fall 2024

Work Experience

AI Development Intern

May 2026 – Present

Tyler Technologies, Lakewood, CO

- Built enterprise natural language search capabilities for Tyler's flagship Enterprise Resource Platform, enabling users to retrieve business information through AI-powered queries
- Develop AI-powered automation solutions by building internal and external **Model Context Protocol (MCP)** tools
- Independently worked on a large legacy application implementing **OpenAPI specifications**, exposing enterprise business capabilities for AI agents
- Reduced the total number of queries per request by ~50% by implementing an architectural level change to the in-built OData query system within Tyler's Enterprise Resource Platform
- Improved response efficiency for support advocates by designing an AI-powered Customer Resource Management system to rapidly retrieve client information
- Collaborate across software engineering and customer support teams to identify high-impact automation opportunities and deliver production-ready AI solutions

Software Development Intern

May 2025 – May 2026

NEI Electric Power Engineering Inc, Lakewood, CO

- Developed custom design processes that are used daily by 315 engineers through internal AutoCAD plugins in **C#/.NET** using the **in-process API**, tailoring automation solutions to engineer specifications
- Collaborating with the Vice President of Strategic Services to design a Python-based automation tool that ingests project inputs and configures the correct design parameters, resources, and tools, significantly reducing project setup time
- Worked on multidisciplinary engineering teams to identify and automate critical engineering workflows to eliminate manual, error-prone tasks, saving engineers significant time and improving process reliability across projects
- Led development of five internal and external projects, establishing coding standards and best practices to ensure consistency, maintainability, and scalability across tools

Sales Assistant

Aug 2024 – May 2025

Oredigger Outfitters, Golden, CO

- Acted as a school ambassador by engaging with prospective students, parents, alumni, and community members while assisting customers, fostering a positive impression of the institution, and contributing to a welcoming campus environment

Project Experience

- **Creation of Mines Peer Evaluation Website:** Collaborated with a team of 4 developers to build and deploy a full-stack peer evaluation web application on **AWS**, contributing primarily to UI design and secure login authentication while serving as Scrum Master to coordinate sprints and team progress
- **Projected Revenue Calculator:** Independently built a company specific revenue visualization tool with **Firebase** that processed CSV file uploads through data pipelines, enabling stakeholders to analyze revenue trends and make data-driven decisions

Skills

- **Technical:** MCP, Object-Oriented Programming, REST APIs, React, Agile methodologies, Amazon Web Services, Google Firebase, Relational databases, Local by Flywheel, Git, Mercurial, Postman, AutoCAD .NET API
- **Languages:** Java, C++, C#, MATLAB, Python, CSS, PHP, HTML, JavaScript
- **Certifications:** IT Specialist - Java
